

Authentication diagram:

Viewers, also known as users with no account, and Family Members can access the start page which contains information about our artefact information storage website. Family Members can log in from the start page. Family Members can also manage their accounts, which includes changing their name, password, profile picture and details. The Admin can log in from the start page as well. The Admin can add family members, which means they will create the base account for family members. The Admin can also manage their accounts. Both Family Members and the Admin can log out and be redirected to the start page.

Artefact Management diagram:

Viewers and Family Members can access the start page. Family members and the Admin can manage artefacts, which means they can change the artefact picture, description and date of the artefact. They can also upload artefacts which can be accessed under “Manage Artefacts”. Both the Admin and Family Members can search for artefacts by name or by key words in the description.
